

**LEAD & COPPER RULE MONITORING AND REPORTING VIOLATION
MANDATORY LANGUAGE – TIER III**

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Fashing Peggy WSC has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened what we are doing to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During July 1, 2018 – December 31, 2018 we did not complete all monitoring for Lead and Copper and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for these contaminants, how many samples we are supposed to take and which the follow-up samples were or will be taken.

Contaminant	Required sampling frequency	Number of Samples taken	When samples should have been taken	When samples were or will be taken
Lead/Copper tap water sampling	10 samples	10	July 1 and December 31, 2018	October 1, 2018, January 2019 and June 2019

What is being done?

We are working to correct the problem. For more information, please contact Carolyn Pfeil Black at (830) 583-3543 or email at elosowsc@elosowater.com

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (i.e. people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Fashing-Peggy WSC. Public Water System Number: TX0070018.
